

2 – 4 November 2022

Save the date!

The Congress

LTA-UITP Singapore International Transport Congress & Exhibition (SITCE) is a leading transport event which is held every two years in the Asia-Pacific region, jointly organised by UITP, Land Transport Authority (LTA) Singapore and MSI Global Pte Ltd.

SITCE has established itself as a key platform for urban mobility stakeholders to come together to discuss and help redefine the public transport landscape! The event gathers policymakers, urban planners, operators as well as solution providers across the globe to forge partnerships, networking, and exchange knowledge.

In its fourth edition, SITCE 2022 aims to explore the theme of **'Heartbeat of Mobility'** and will focus on improving commuter experience so it can be safer, more inclusive, and convenient.

The Congress provides a platform for invigorating discussions on innovative solutions for issues and challenges faced by all those in the urban transport sector. Industry leaders and experts will be sharing their knowledge and insights on the current landscape of urban transport. Stay tuned for more information about the congress!

Building Net Zero Transport Systems

Public transport is on the world's climate change agenda. This sector must proactively look at ways to reduce carbon emission while dramatically improve ridership as a green transport mode itself.

Resiliency of the Mobility Ecosystem

The transport sector must continue to move forward by building a resilient mobility ecosystem where service providers must put passengers first, be proactive in safety and security management as well as having a sustainable outlook on operating model and funding.

Revolutionising the Public Bus Industry

Transforming the bus industry often includes reform of bus service planning, fleet procurement and management, talent management, digitalisation of operations, funding and many more. This stream will feature best practices and innovative use cases from the public bus sector.

Acceleration of Urban Rail: Assets, Infrastructure and Operations

Urban rail is undergoing through rapid changes. This stream will focus on the adoption of innovation and technological solutions necessary for urban railways to continue to excel and flourish in our cities.

Smart Cities of Mobility – Active, Shared and Innovative

Smart cities' goals are to ensure that urban mobility is seamless, efficient and diverse. They also mean that mobility would withstand disruptions and provide a variety of options for the diverse needs of commuters.
