## Item Description: (Please be thorough. Attach additional information if needed.)

The Line 51 A/B transfer point at Rockridge BART has been challenging for years. Riders report missed connections, long waits between buses, and an inconvenient walk to the next bus. In January 2022 staff presented a report with short and long term recommendations to improve the Line 51 transfer. The Board would like an update on these efforts.

The report should include information about the problem: data on number/frequency of missed connections and rider affected, changes over time, amount of time allotted at the transfer point, reasons for missed connections, and updates on implementing the “connection protection” feature which holds the bus until the second bus arrives, etc.

## Purpose:

Improving the transfer between the 51A and B will improve the rider experience, which is one of our primary goals.

## What will be accomplished/desired outcome:

See above.
