

**Institutional Pass Program Update**

The AC Transit institutional programs enrolled 3,839 new participants this quarter, bringing the total participant number to 73,037. As the student population makes up most of the institutional programs, the number of users often correlates with the academic calendar. As expected, the new enrollment decreased by 81% compared to Q1. Although the ridership dipped slightly during November and December due to the holiday breaks, it is a 32% increase compared to Q1.
