

Additional Information

On December 8, 2022, MTC staff and its consultant released the agenda packet for the December 12, 2022 Network Management Business Case Advisory Group meeting. Included in the packet is a refined RNM near-term proposal that updates the initial proposal included in SR 22-461 that was scheduled to be presented to the AC Transit Board of Directors on December 14, 2022. The refined proposal incorporates feedback received from the Advisory Group meeting on November 14, 2022, as well as subsequent feedback from key stakeholders involved in the RNM development process. The refinements are highlighted in the recently attached slide deck to this Staff Report.

MTC staff plans to present the refined proposal to the AC Transit Board on 1/11/22 for feedback. In addition, MTC plans to hold a Transit Board Information Session on 1/12/22 to hear feedback from representatives of all transit operator boards. Following these meetings, MTC staff intends to bring the refined proposal to its committees and commission for review and eventual approval in February 2023.
