Agenda

01 What is WAV?

02 How to ride with UberWAV

03 SB 1376 (2018) Access For All

04 Uber + Public Transit

05 Q&A

Accessibility Features + Options

For riders who are blind or low vision

For riders who are deaf or hard-of-hearing

For riders using folding wheelchairs, motorized wheelchairs & scooters

What is WAV?

UberWAV provides affordable rides in wheelchair-accessible vehicles (WAV). In certain cities, riders who use motorized wheelchairs or scooters can request a ride in a WAV. WAV driver-partners are certified by a third party in safely driving and assisting people with disabilities.

Fast, reliable rides

When and where WAV is available, rides are requested on demand, and work around your life, not the other way around.

Trips that fit your budget

The price of a WAV ride is similar to an uberX trip, our basic ride option.

Specialized drivers to assist you

Every WAV driver has completed a certification course offered by a third party to help you enter and exit the vehicle.

How to ride with WAV

Q&A

An aerial photograph of a city, likely New York City, taken from a high vantage point. The image shows a dense urban landscape with various buildings, including residential and commercial structures. The sky is a mix of orange, yellow, and blue, indicating a sunset or sunrise. The city is surrounded by greenery, and a body of water is visible in the distance. The overall scene is a wide-angle shot that captures the scale and density of the city.

Thank you
