SB 617 allow for the use of “progressive design-build procurement.”</p> <p>Progressive design-build procurement is a new variation of design-build that utilizes a two-step process. In the first step, the local agency uses a best value process to select a design-build entity who completes preliminary plans and pre-construction services necessary to provide a cost estimate and final design proposal. The project then “progresses” to the second step, where the local agency and the design-build entity agree to a final design, project cost, and schedule. If an agreement cannot be reached the local agency and the design-build entity can part ways, but the local agency can still use the work acquired during the initial phase.</p>
